**Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice** Joan Garfield, Dani Ben-Zvi

Increased attention is being paid to the need for statistically educated citizens: statistics is now included in the K-12 mathematics curriculum, increasing numbers of students are taking courses in high school, and introductory statistics courses are required in college. However, increasing the amount of instruction is not sufficient to prepare statistically literate citizens. A major change is needed in how statistics is taught. To bring about this change, three dimensions of teacher knowledge need to be addressed: their knowledge of statistical content, their pedagogical knowledge, and their statistical-pedagogical knowledge, i.e., their specific knowledge about how to teach statistics. This book is written for mathematics and statistics educators and researchers. It summarizes the research and highlights the important concepts for teachers to emphasize, and shows the interrelationships among concepts. It makes specific suggestions regarding how to build classroom activities, integrate technological tools, and assess students' learning.

*This is a unique book. While providing a wealth of examples through lessons and data sets, it is also the best attempt by members of our profession to integrate suggestions from research findings with statistics concepts and pedagogy. The book's message about the importance of listening to research is loud and clear, as is its message about alternative ways of teaching statistics. This book will impact instructors, giving them pause to consider: "Is what I'm doing now really the best thing for my students? What could I do better?"*

J. Michael Shaughnessy, Professor, Dept of Mathematical Sciences, Portland State University, USA

*This is a much-needed text for linking research and practice in teaching statistics. The authors have provided a comprehensive overview of the current state-of-the-art in statistics education research. The insights they have gleaned from the literature should be tremendously helpful for those involved in teaching and researching introductory courses.*

Randall E. Groth, Assistant Professor of Mathematics Education, Salisbury University, USA

### **From reader reviews:**

#### **Robert Stewart:**

Here thing why that Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice are different and reliable to be yours. First of all examining a book is good nevertheless it depends in the content of computer which is the content is as tasty as food or not. Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice giving you information deeper as different ways, you can find any guide out there but there is no guide that similar with Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice. It gives you thrill reading journey, its open up your eyes about the thing this happened in the world which is possibly can be happened around you. You can actually bring everywhere like in recreation area, café, or even in your technique home by train. If you are having difficulties in bringing the published book maybe the form of Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice in e-book can be your option.

#### **Ruby Freeman:**

Now a day those who Living in the era just where everything reachable by interact with the internet and the resources inside it can be true or not demand people to be aware of each details they get. How people have to be smart in acquiring any information nowadays? Of course the answer is reading a book. Reading through a book can help persons out of this uncertainty Information specially this Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice book because book offers you rich facts and knowledge. Of course the data in this book hundred pct guarantees there is no doubt in it you probably know this.

#### **Livia Wilder:**

Do you have something that you prefer such as book? The guide lovers usually prefer to opt for book like comic, short story and the biggest you are novel. Now, why not seeking Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice that give your pleasure preference will be satisfied by simply reading this book. Reading routine all over the world can be said as the way for people to know world much better then how they react to the world. It can't be claimed constantly that reading habit only for the geeky man or woman but for all of you who wants to end up being success person. So , for all of you who want to start looking at as your good habit, you are able to pick Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice become your own personal starter.

#### **James Hall:**

That book can make you to feel relax. This particular book Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice was bright colored and of course has pictures around. As we know that book Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice has many kinds or type. Start from kids until young adults. For example Naruto or Investigation company Conan

you can read and think that you are the character on there. Therefore not at all of book are usually make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book for yourself and try to like reading that.
