Embedded C Programming and the Atmel AVR

Richard H. Barnett, Sarah Cox, Larry O'Cull

Embedded C Programming and the Atmel AVR Richard H. Barnett, Sarah Cox, Larry O'Cull
Enter the world of embedded programming and microcontroller applications! One of the only books available today that uses the increasingly popular and cost-effective Atmel AVR embedded controller as the platform and application for learning, Embedded C Programming and the Atmel AVR, 2E is the perfect choice for novices. Featuring a host of fully-functional example applications, this highly innovative book enables users to adopt a "learn by doing" approach as they develop the knowledge and skills needed to achieve proficiency. Following an introduction to Atmel AVR RISC processors, readers are launched immediately into an embedded C language tutorial. Here, they'll experiment with variables and constants, operators and expressions, control statements, pointers and arrays, memory types, preprocessor directives, real-time methods, and more! In addition to a comprehensive library functions reference, an entire chapter on the CodeVision AVR C Compiler provides clear, step-by-step instruction in IDE installation and operation, mixing Assembler with C, and using the Code Wizard Code Generator. Use of peripherals - such as keypads, LCD displays, and other common embedded microcontroller-related devices - is also explored fully in this all-inclusive, state-of-the-art programmer's how-to and reference manual.

From reader reviews:

Aimee Nguyen:

What do you about book? It is not important along? Or just adding material if you want something to explain what the ones you have problem? How about your extra time? Or are you busy man or woman? If you don't have spare time to try and do others business, it is make one feel bored faster. And you have free time? What did you do? Everybody has many questions above. They must answer that question mainly because just their can do this. It said that about e-book. Book is familiar in each person. Yes, it is suitable. Because start from on pre-school until university need this particular Embedded C Programming and the Atmel AVR to read.

Wendell Nadeau:

As people who live in the actual modest era should be up-date about what going on or facts even knowledge to make these people keep up with the era that is certainly always change and advance. Some of you maybe will probably update themselves by looking at books. It is a good choice to suit your needs but the problems coming to an individual is you don't know which one you should start with. This Embedded C Programming and the Atmel AVR is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and wish in this era.

Brenda Fairfax:

This Embedded C Programming and the Atmel AVR is great publication for you because the content and that is full of information for you who always deal with world and also have to make decision every minute. This book reveal it details accurately using great arrange word or we can point out no rambling sentences within it. So if you are read it hurriedly you can have whole facts in it. Doesn't mean it only will give you straight forward sentences but challenging core information with splendid delivering sentences. Having Embedded C Programming and the Atmel AVR in your hand like getting the world in your arm, facts in it is not ridiculous one particular. We can say that no book that offer you world within ten or fifteen minute right but this reserve already do that. So , this really is good reading book. Hey Mr. and Mrs. busy do you still doubt that will?

Luis Gonzalez:

Don't be worry should you be afraid that this book will filled the space in your house, you may have it in e-book method, more simple and reachable. This particular Embedded C Programming and the Atmel AVR can give you a lot of close friends because by you investigating this one book you have point that they don't and make a person more like an interesting person. This particular book can be one of a step for you to get success. This reserve offer you information that perhaps your friend doesn't realize, by knowing more than additional make you to be great folks. So , why hesitate? We should have Embedded C Programming and the Atmel AVR.
