Hair of the Alien: DNA and Other Forensic Evidence of Alien Abductions Bill Chalker

Shocking. Controversial. Unprecedented. A case unlike any other in the annals of UFO investigation, DNA research, or alien abduction.

Sydney, Australia. July 23, 1992. Twenty-eight-year-old Peter Khoury was awoken by what appeared to be two females -- both striking and unearthly -- kneeling on his bed. What transpired between them was a physical assault as bizarre and disorienting as it was unnatural. Then, as quickly as they had arrived, they vanished. Khoury had become one of a legion of alien abductees with inexplicable experiences, but this particular incident stood apart from all the others. This time, there was evidence -- two strands of white-blond hair from one of the females.

Khoury's case would result in the very first forensic DNA analysis of "alien abduction" evidence and revealed an extraordinary biological anomaly -- one genetically close to human yet almost impossibly far from the human mainstream. A gripping account of one of the great mysteries of our time, *Hair of the Alien* brings us closer than ever before to understanding our past, our origins, and our place in the universe. The results are nothing less than startling.
