Architecture and Methods for Flexible Content Management in Peer-to-Peer Systems

Udo Bartlang

Architecture and Methods for Flexible Content Management in Peer-to-Peer Systems Udo Bartlang At times when the IT manager's best friend is systems consolidation (which is a euphemism for centralisation), it may come somewhat as a surprise for you that this book investigates decentralisation in the context of content management systems. It may seem quite obvious that content will and should be managed by the party who creates and owns the content, and hence should be held in a?somewhat?centralised and managed location. However, over the past few years, we have been witnesses of some important trends and developments which call for novel ways of thinking about content management and maybe even broader, about computer systems in general. First, ongoing business globalization creates natural distribution of information at a corp- ate level, as well as decentralization of control over business resources and business processes. Changing alliances with partners require ?exible architectures for content management that canadapttochangingconstellations, roles, andaccessrights. Second, theneedforoutsourcing and resource e?ciency has brought about concepts of virtualization, recently culminating in the cloud computing buzzword. Virtualization of content management services requires - tremely scalable and ?exible underlying information and communication architectures. These kinds of solutions are theoretically and practically impossible to implement based on c- tralised client-server architectures. Third, we are currently experiencing a dramatic shift in the roles of consumers in the Internet. The times have gone when quality content was only delivered by publishers and news agencies. Wikis and other Web 2. 0 tools empower consumers to produce and publish their personal content.

From reader reviews:

Mark Feaster:

Reading a reserve can be one of a lot of activity that everyone in the world likes. Do you like reading book consequently. There are a lot of reasons why people fantastic. First reading a guide will give you a lot of new details. When you read a book you will get new information because book is one of numerous ways to share the information or perhaps their idea. Second, looking at a book will make an individual more imaginative. When you examining a book especially hype book the author will bring you to imagine the story how the figures do it anything. Third, you may share your knowledge to others. When you read this Architecture and Methods for Flexible Content Management in Peer-to-Peer Systems, you may tells your family, friends and also soon about yours reserve. Your knowledge can inspire different ones, make them reading a e-book.

Terry Pullen:

The e-book untitled Architecture and Methods for Flexible Content Management in Peer-to-Peer Systems is the book that recommended to you to read. You can see the quality of the reserve content that will be shown to anyone. The language that creator use to explained their way of doing something is easily to understand. The author was did a lot of investigation when write the book, hence the information that they share for your requirements is absolutely accurate. You also can get the e-book of Architecture and Methods for Flexible Content Management in Peer-to-Peer Systems from the publisher to make you a lot more enjoy free time.

Johnny Harper:

Precisely why? Because this Architecture and Methods for Flexible Content Management in Peer-to-Peer Systems is an unordinary book that the inside of the e-book waiting for you to snap that but latter it will distress you with the secret that inside. Reading this book next to it was fantastic author who have write the book in such wonderful way makes the content on the inside easier to understand, entertaining way but still convey the meaning completely. So , it is good for you because of not hesitating having this any longer or you going to regret it. This excellent book will give you a lot of advantages than the other book have got such as help improving your proficiency and your critical thinking approach. So , still want to hold up having that book? If I were you I will go to the guide store hurriedly.

Claudette Everett:

This Architecture and Methods for Flexible Content Management in Peer-to-Peer Systems is new way for you who has curiosity to look for some information mainly because it relief your hunger of information. Getting deeper you onto it getting knowledge more you know or perhaps you who still having small amount of digest in reading this Architecture and Methods for Flexible Content Management in Peer-to-Peer Systems can be the light food in your case because the information inside this specific book is easy to get by means of anyone. These books produce itself in the form which is reachable by anyone, yes I mean in the e-book contact form. People who think that in book form make them feel sleepy even dizzy this book is the

answer. So there is absolutely no in reading a e-book especially this one. You can find actually looking for. It should be here for a person. So , don't miss that! Just read this e-book type for your better life and also knowledge.
