Clifford Algebras in Analysis and Related Topics (Studies in Advanced Mathematics)

John Ryan

Clifford Algebras in Analysis and Related Topics (Studies in Advanced Mathematics) John Ryan
This new book contains the most up-to-date and focused description of the applications of Clifford algebras in analysis, particularly classical harmonic analysis. It is the first single volume devoted to applications of Clifford analysis to other aspects of analysis.
All chapters are written by world authorities in the area. Of particular interest is the contribution of Professor Alan McIntosh. He gives a detailed account of the links between Clifford algebras, monogenic and harmonic functions and the correspondence between monogenic functions and holomorphic functions of several complex variables under Fourier transforms. He describes the correspondence between algebras of singular integrals on Lipschitz surfaces and functional calculi of Dirac operators on these surfaces. He also discusses links with boundary value problems over Lipschitz domains.
Other specific topics include Hardy spaces and compensated compactness in Euclidean space; applications to acoustic scattering and Galerkin estimates; scattering theory for orthogonal wavelets; applications of the conformal group and Vahalen matrices; Newmann type problems for the Dirac operator; plus much, much more!
Clifford Algebras in Analysis and Related Topics also contains the most comprehensive section on open problems available. The book presents the most detailed link between Clifford analysis and classical harmonic analysis. It is a refreshing break from the many expensive and lengthy volumes currently found on the subject.

From reader reviews:

Barbara Marburger:

The e-book untitled Clifford Algebras in Analysis and Related Topics (Studies in Advanced Mathematics) is the reserve that recommended to you to read. You can see the quality of the guide content that will be shown to anyone. The language that article author use to explained their ideas are easily to understand. The article author was did a lot of exploration when write the book, hence the information that they share to you personally is absolutely accurate. You also could possibly get the e-book of Clifford Algebras in Analysis and Related Topics (Studies in Advanced Mathematics) from the publisher to make you much more enjoy free time.

Thomas Britton:

This Clifford Algebras in Analysis and Related Topics (Studies in Advanced Mathematics) is great publication for you because the content which can be full of information for you who all always deal with world and possess to make decision every minute. This kind of book reveal it data accurately using great manage word or we can state no rambling sentences in it. So if you are read that hurriedly you can have whole data in it. Doesn't mean it only provides straight forward sentences but difficult core information with wonderful delivering sentences. Having Clifford Algebras in Analysis and Related Topics (Studies in Advanced Mathematics) in your hand like having the world in your arm, information in it is not ridiculous 1. We can say that no reserve that offer you world inside ten or fifteen second right but this e-book already do that. So , this really is good reading book. Heya Mr. and Mrs. active do you still doubt this?

Steven Cruce:

As a college student exactly feel bored to reading. If their teacher asked them to go to the library or even make summary for some publication, they are complained. Just small students that has reading's heart or real their leisure activity. They just do what the professor want, like asked to go to the library. They go to there but nothing reading very seriously. Any students feel that reading through is not important, boring as well as can't see colorful images on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this Clifford Algebras in Analysis and Related Topics (Studies in Advanced Mathematics) can make you sense more interested to read.

Dennis Utley:

What is your hobby? Have you heard which question when you got college students? We believe that that concern was given by teacher on their students. Many kinds of hobby, All people has different hobby. And you know that little person similar to reading or as examining become their hobby. You should know that reading is very important and also book as to be the factor. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You get good news or update with regards to something by book.

Amount types of books that can you take to be your object. One of them is niagra Clifford Algebras in Analysis and Related Topics (Studies in Advanced Mathematics).
