Human Adaptability, Student Economy Edition: An Introduction to Ecological Anthropology Emilio F. Moran

Westview Press is pleased to offer a new, paperback **Student Economy Edition** of our best-selling title, *Human Adaptability*. This Student Economy Edition contains the same material as the third edition of *Human Adaptability* (ISBN: 9780813343679)—the same text, the same figures, and the same page numbers—and is available to own for about the same price as renting the print book.

Designed to help students understand the multiple levels at which human populations respond to their surroundings, this essential text offers the most complete discussion of environmental, physiological, behavioral, and cultural adaptive strategies available. Among the unique features that make ***Human Adaptability*** *outstanding as both a textbook for students and a reference book for professionals* are a complete discussion of the development of ecological anthropology and relevant research methods; the use of an ecosystem approach with emphasis on arctic, high altitude, arid land, grassland, tropical rain forest, and urban environments; an extensive and updated bibliography on ecological anthropology; and a comprehensive glossary of technical terms.

Entirely new to the third edition are chapters on urban sustainability and methods of spatial analysis, with enhanced emphasis throughout on the role of gender in human-adaptability research and on global environmental change as it affects particular ecosystems. In addition, new sections in each chapter guide students to websites that provide access to relevant material, complement the text's coverage of biomes, and suggest ways to become active in environmental issues.
