## **Solar Module Packaging: Polymeric Requirements and Selection** Michelle Poliskie

While global demand for photovoltaic (PV) modules has increased approximately 45 percent per year over the past decade, PV modules must be durable and inexpensive to compete with traditional energy resources. Often overlooked as a means to improve solar technology, polymer packaging is not only the key to protecting fragile solar cells from environmental factors, but is also the critical path for increasing the power performance of a PV module.

**Solar Module Packaging: Polymeric Requirements and Selection** explores current and future opportunities in PV polymeric packaging, emphasizing how it can simultaneously reduce cost, increase weatherability, and improve a PV module's power. The book offers an insider's perspective on the manufacturing processes and needs of the solar industry and reveals opportunities for future material development and processing.

A broad survey of the polymeric packaging of solar cells, the text covers various classifications of polymers, their material properties, and optimal processing conditions. Taking a practical approach to material selection, it emphasizes industrial requirements for material development, such as cost reduction, increased material durability, improved module performance, and ease of processing. Addressing cost and profitability, the author examines the economics behind polymeric packaging and how it influences the selection process used by solar companies.

Suitable for nonspecialists in polymer science, the book provides a basic understanding of polymeric concepts, fundamental properties, and processing techniques commonly used in solar module packaging. It presents guidelines for using polymers in commercial PV modules as well as the tests required to establish confidence in the selection process.

### **From reader reviews:**

#### **Eric Lowe:**

Reading a book tends to be new life style with this era globalization. With reading you can get a lot of information that can give you benefit in your life. Having book everyone in this world may share their idea. Publications can also inspire a lot of people. A great deal of author can inspire their very own reader with their story or even their experience. Not only situation that share in the publications. But also they write about the data about something that you need case in point. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors these days always try to improve their talent in writing, they also doing some investigation before they write to their book. One of them is this Solar Module Packaging: Polymeric Requirements and Selection.

#### **Laura Thompson:**

Are you kind of occupied person, only have 10 as well as 15 minute in your day time to upgrading your mind proficiency or thinking skill perhaps analytical thinking? Then you are experiencing problem with the book in comparison with can satisfy your short space of time to read it because this time you only find book that need more time to be read. Solar Module Packaging: Polymeric Requirements and Selection can be your answer because it can be read by an individual who have those short free time problems.

#### **Scottie Kelly:**

This Solar Module Packaging: Polymeric Requirements and Selection is brand-new way for you who has attention to look for some information given it relief your hunger info. Getting deeper you in it getting knowledge more you know or you who still having small amount of digest in reading this Solar Module Packaging: Polymeric Requirements and Selection can be the light food for you because the information inside this kind of book is easy to get by means of anyone. These books build itself in the form which is reachable by anyone, sure I mean in the e-book form. People who think that in book form make them feel tired even dizzy this publication is the answer. So there isn't any in reading a guide especially this one. You can find what you are looking for. It should be here for an individual. So , don't miss this! Just read this e-book type for your better life as well as knowledge.

#### **Thelma Burke:**

Some people said that they feel fed up when they reading a e-book. They are directly felt this when they get a half elements of the book. You can choose the book Solar Module Packaging: Polymeric Requirements and Selection to make your own reading is interesting. Your current skill of reading talent is developing when you similar to reading. Try to choose very simple book to make you enjoy to read it and mingle the idea about book and reading especially. It is to be initially opinion for you to like to available a book and read it. Beside that the guide Solar Module Packaging: Polymeric Requirements and Selection can to be a newly purchased friend when you're truly feel alone and confuse with the information must you're doing of their

time.
