Managing Your Biological Data with Python (Chapman & Hall/CRC Mathematical and Computational Biology) Allegra Via, Kristian Rother, Anna Tramontano

Take Control of Your Data and Use Python with Confidence

Requiring no prior programming experience, **Managing Your Biological Data with Python** empowers biologists and other life scientists to work with biological data on their own using the Python language. The book teaches them not only how to program but also how to manage their data. It shows how to read data from files in different formats, analyze and manipulate the data, and write the results to a file or computer screen.

The first part of the text introduces the Python language and teaches readers how to write their first programs. The second part presents the basic elements of the language, enabling readers to write small programs independently. The third part explains how to create bigger programs using techniques to write well-organized, efficient, and error-free code. The fourth part on data visualization shows how to plot data and draw a figure for an article or slide presentation. The fifth part covers the Biopython programming library for reading and writing several biological file formats, querying the NCBI online databases, and retrieving biological records from the web. The last part provides a cookbook of 20 specific programming "recipes," ranging from secondary structure prediction and multiple sequence alignment analyses to superimposing protein three-dimensional structures.

Tailoring the programming topics to the everyday needs of biologists, the book helps them easily analyze data and ultimately make better discoveries. Every piece of code in the text is aimed at solving real biological problems.

From reader reviews:

Anthony Collins:

A lot of people always spent their very own free time to vacation or maybe go to the outside with them family members or their friend. Were you aware? Many a lot of people spent that they free time just watching TV, or perhaps playing video games all day long. If you want to try to find a new activity that's look different you can read any book. It is really fun in your case. If you enjoy the book that you read you can spent the whole day to reading a reserve. The book Managing Your Biological Data with Python (Chapman & Hall/CRC Mathematical and Computational Biology) it is quite good to read. There are a lot of people that recommended this book. These people were enjoying reading this book. In the event you did not have enough space bringing this book you can buy the particular e-book. You can m0ore easily to read this book out of your smart phone. The price is not to fund but this book offers high quality.

Steven Purdy:

Playing with family in a very park, coming to see the coastal world or hanging out with good friends is thing that usually you have done when you have spare time, then why you don't try issue that really opposite from that. A single activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Managing Your Biological Data with Python (Chapman & Hall/CRC Mathematical and Computational Biology), you are able to enjoy both. It is good combination right, you still desire to miss it? What kind of hang-out type is it? Oh seriously its mind hangout people. What? Still don't obtain it, oh come on its known as reading friends.

Nancy Leto:

In this age globalization it is important to someone to acquire information. The information will make a professional understand the condition of the world. The healthiness of the world makes the information quicker to share. You can find a lot of recommendations to get information example: internet, paper, book, and soon. You can see that now, a lot of publisher in which print many kinds of book. Typically the book that recommended for your requirements is Managing Your Biological Data with Python (Chapman & Hall/CRC Mathematical and Computational Biology) this book consist a lot of the information on the condition of this world now. This kind of book was represented how can the world has grown up. The dialect styles that writer require to explain it is easy to understand. The particular writer made some study when he makes this book. Honestly, that is why this book suited all of you.

Jean Fair:

On this era which is the greater particular person or who has ability to do something more are more treasured than other. Do you want to become certainly one of it? It is just simple method to have that. What you should do is just spending your time not very much but quite enough to have a look at some books. Among the books in the top list in your reading list is Managing Your Biological Data with Python (Chapman &

Hall/CRC Mathematical and Computational Biology). This book that is certainly qualified as The Hungry Slopes can get you closer in turning out to be precious person. By looking up and review this guide you can get many advantages.
