## **Solar Energy Forecasting and Resource Assessment** Jan Kleissl

*Solar Energy Forecasting and Resource Assessment* is a vital text for solar energy professionals, addressing a critical gap in the core literature of the field. As major barriers to solar energy implementation, such as materials cost and low conversion efficiency, continue to fall, issues of intermittency and reliability have come to the fore. Scrutiny from solar project developers and their financiers on the accuracy of long-term resource projections and grid operators' concerns about variable short-term power generation have made the field of solar forecasting and resource assessment pivotally important. This volume provides an authoritative voice on the topic, incorporating contributions from an internationally recognized group of top authors from both industry and academia, focused on providing information from underlying scientific fundamentals to practical applications and emphasizing the latest technological developments driving this discipline forward.

- The only reference dedicated to forecasting and assessing solar resources enables a complete understanding of the state of the art from the world's most renowned experts.
- Demonstrates how to derive reliable data on solar resource availability and variability at specific locations to support accurate prediction of solar plant performance and attendant financial analysis.
- Provides cutting-edge information on recent advances in solar forecasting through monitoring, satellite and ground remote sensing, and numerical weather prediction.

### From reader reviews:

#### **Timothy Rocha:**

What do you about book? It is not important along with you? Or just adding material when you really need something to explain what the ones you have problem? How about your extra time? Or are you busy man or woman? If you don't have spare time to try and do others business, it is make you feel bored faster. And you have free time? What did you do? Everybody has many questions above. The doctor has to answer that question because just their can do this. It said that about book. Book is familiar on every person. Yes, it is proper. Because start from on pre-school until university need this specific Solar Energy Forecasting and Resource Assessment to read.

#### **Joseph Benoit:**

As people who live in typically the modest era should be up-date about what going on or facts even knowledge to make these individuals keep up with the era that is certainly always change and progress. Some of you maybe will certainly update themselves by reading books. It is a good choice in your case but the problems coming to anyone is you don't know which you should start with. This Solar Energy Forecasting and Resource Assessment is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and wish in this era.

#### **Carl Melton:**

A lot of people always spent their very own free time to vacation or go to the outside with them loved ones or their friend. Were you aware? Many a lot of people spent many people free time just watching TV, or even playing video games all day long. If you need to try to find a new activity honestly, that is look different you can read any book. It is really fun in your case. If you enjoy the book that you read you can spent the entire day to reading a e-book. The book Solar Energy Forecasting and Resource Assessment it is quite good to read. There are a lot of people that recommended this book. We were holding enjoying reading this book. When you did not have enough space to deliver this book you can buy the actual e-book. You can m0ore easily to read this book from the smart phone. The price is not very costly but this book possesses high quality.

#### **Becky Duncan:**

Book is one of source of knowledge. We can add our knowledge from it. Not only for students and also native or citizen require book to know the revise information of year in order to year. As we know those books have many advantages. Beside we add our knowledge, also can bring us to around the world. Through the book Solar Energy Forecasting and Resource Assessment we can take more advantage. Don't one to be creative people? To be creative person must love to read a book. Merely choose the best book that ideal with your aim. Don't possibly be doubt to change your life by this book Solar Energy Forecasting and Resource Assessment. You can more attractive than now.
