Making Globally Distributed Software Development a Success Story: International Conference on Software Process, ICSP 2008 Leipzig, Germany, May 10-11, ... / Programming and Software Engineering)

This volume contains papers presented at the International Conference on Software Process (ICSP 2008) held in Leipzig, Germany, during May 10-11, 2008. ICSP 2008 was the second conference of the ICSP series. The theme of ICSP 2008 was "Making Globally Distributed Software Development a Success Story. " Software developers work in a dynamic context of frequently changing technologies and with limited resources. Globally distributed development teams are under ev- increasing pressure to deliver their products more quickly and with higher levels of qu- ity. At the same time, global competition is forcing software development organizations to cut costs by rationalizing processes, outsourcing part of or all development activities, reusing existing software in new or modified applications, and evolving existing systems to meet new needs, while still minimizing the risk of projects failing to deliver. To address these difficulties, new and modified processes are emerging, including agile methods and plan-based product line development. Open Source, COTS, and com- nity-developed software are becoming more and more popular. Outsourcing coupled with 24/7 development demands well-defined processes to support the coordination of organizationally—and geographically—separated teams. The accepted papers present completed research or advanced work-in-progress in all areas of software and systems development process including: agile software pr- esses, CMMI, novel techniques for software process representation and analysis; process tools and metrics; and the simulation and modeling of software processes. Contributions reflecting real-world experience, or derived directly from industrial or open-source software development and evolution, were particularly welcome.

From reader reviews:

Rebecca Burks:

Book is definitely written, printed, or created for everything. You can recognize everything you want by a book. Book has a different type. As it is known to us that book is important matter to bring us around the world. Beside that you can your reading ability was fluently. A publication Making Globally Distributed Software Development a Success Story: International Conference on Software Process, ICSP 2008 Leipzig, Germany, May 10-11, ... / Programming and Software Engineering) will make you to always be smarter. You can feel far more confidence if you can know about every little thing. But some of you think which open or reading some sort of book make you bored. It is not make you fun. Why they are often thought like that? Have you in search of best book or suited book with you?

Catherine Stoltenberg:

Spent a free time to be fun activity to accomplish! A lot of people spent their free time with their family, or their own friends. Usually they performing activity like watching television, likely to beach, or picnic within the park. They actually doing same every week. Do you feel it? Would you like to something different to fill your current free time/ holiday? Can be reading a book is usually option to fill your free time/ holiday. The first thing you ask may be what kinds of guide that you should read. If you want to consider look for book, may be the book untitled Making Globally Distributed Software Development a Success Story: International Conference on Software Process, ICSP 2008 Leipzig, Germany, May 10-11, ... / Programming and Software Engineering) can be good book to read. May be it might be best activity to you.

Steven Murray:

Reading can called mind hangout, why? Because when you find yourself reading a book especially book entitled Making Globally Distributed Software Development a Success Story: International Conference on Software Process, ICSP 2008 Leipzig, Germany, May 10-11, ... / Programming and Software Engineering) your brain will drift away trough every dimension, wandering in every aspect that maybe unidentified for but surely can be your mind friends. Imaging just about every word written in a guide then become one web form conclusion and explanation in which maybe you never get ahead of. The Making Globally Distributed Software Development a Success Story: International Conference on Software Process, ICSP 2008 Leipzig, Germany, May 10-11, ... / Programming and Software Engineering) giving you one more experience more than blown away your head but also giving you useful facts for your better life within this era. So now let us teach you the relaxing pattern at this point is your body and mind will likely be pleased when you are finished reading through it, like winning a. Do you want to try this extraordinary shelling out spare time activity?

Amy Gutierrez:

Don't be worry in case you are afraid that this book can filled the space in your house, you might have it in e-book method, more simple and reachable. This kind of Making Globally Distributed Software Development a Success Story: International Conference on Software Process, ICSP 2008 Leipzig, Germany, May 10-11, ... / Programming and Software Engineering) can give you a lot of pals because by you considering this one book you have matter that they don't and make you actually more like an interesting person. This kind of book can be one of one step for you to get success. This e-book offer you information that probably your friend doesn't understand, by knowing more than some other make you to be great persons. So , why hesitate? We should have Making Globally Distributed Software Development a Success Story: International Conference on Software Process, ICSP 2008 Leipzig, Germany, May 10-11, ... / Programming and Software Engineering).
