Epidemiology: Study Design and Data Analysis, Third Edition (Chapman & Hall/CRC Texts in Statistical Science)

Mark Woodward

Epidemiology: Study Design and Data Analysis, Third Edition (Chapman & Hall/CRC Texts in Statistical Science) Mark Woodward

Highly praised for its broad, practical coverage, the second edition of this popular text incorporated the major statistical models and issues relevant to epidemiological studies. **Epidemiology: Study Design and Data Analysis, Third Edition** continues to focus on the quantitative aspects of epidemiological research. Updated and expanded, this edition shows students how statistical principles and techniques can help solve epidemiological problems.

New to the Third Edition

- New chapter on risk scores and clinical decision rules
- New chapter on computer-intensive methods, including the bootstrap, permutation tests, and missing value imputation
- New sections on binomial regression models, competing risk, information criteria, propensity scoring, and splines
- Many more exercises and examples using both Stata and SAS
- More than 60 new figures

After introducing study design and reviewing all the standard methods, this self-contained book takes students through analytical methods for both general and specific epidemiological study designs, including cohort, case-control, and intervention studies. In addition to classical methods, it now covers modern methods that exploit the enormous power of contemporary computers. The book also addresses the problem of determining the appropriate size for a study, discusses statistical modeling in epidemiology, covers methods for comparing and summarizing the evidence from several studies, and explains how to use statistical models in risk forecasting and assessing new biomarkers. The author illustrates the techniques with numerous real-world examples and interprets results in a practical way. He also includes an extensive list of references for further reading along with exercises to reinforce understanding.

Web Resource

A wealth of supporting material can be downloaded from the book's CRC Press web page, including:

- Real-life data sets used in the text
- SAS and Stata programs used for examples in the text
- SAS and Stata programs for special techniques covered
- Sample size spreadsheet

From reader reviews:

Joseph Felix:

Book is to be different for every grade. Book for children until eventually adult are different content. As you may know that book is very important usually. The book Epidemiology: Study Design and Data Analysis, Third Edition (Chapman & Hall/CRC Texts in Statistical Science) ended up being making you to know about other understanding and of course you can take more information. It doesn't matter what advantages for you. The reserve Epidemiology: Study Design and Data Analysis, Third Edition (Chapman & Hall/CRC Texts in Statistical Science) is not only giving you far more new information but also being your friend when you sense bored. You can spend your own spend time to read your book. Try to make relationship while using book Epidemiology: Study Design and Data Analysis, Third Edition (Chapman & Hall/CRC Texts in Statistical Science). You never feel lose out for everything should you read some books.

Raymond Hernandez:

In this 21st century, people become competitive in every single way. By being competitive currently, people have do something to make them survives, being in the middle of the actual crowded place and notice by surrounding. One thing that oftentimes many people have underestimated it for a while is reading. Sure, by reading a reserve your ability to survive increase then having chance to stay than other is high. For yourself who want to start reading some sort of book, we give you this particular Epidemiology: Study Design and Data Analysis, Third Edition (Chapman & Hall/CRC Texts in Statistical Science) book as starter and daily reading guide. Why, because this book is greater than just a book.

Sheila Seim:

As people who live in often the modest era should be change about what going on or info even knowledge to make all of them keep up with the era which is always change and move ahead. Some of you maybe will certainly update themselves by reading through books. It is a good choice to suit your needs but the problems coming to an individual is you don't know what type you should start with. This Epidemiology: Study Design and Data Analysis, Third Edition (Chapman & Hall/CRC Texts in Statistical Science) is our recommendation to make you keep up with the world. Why, since this book serves what you want and wish in this era.

Donald Purcell:

A lot of e-book has printed but it is different. You can get it by internet on social media. You can choose the top book for you, science, comedy, novel, or whatever by searching from it. It is referred to as of book Epidemiology: Study Design and Data Analysis, Third Edition (Chapman & Hall/CRC Texts in Statistical Science). You can include your knowledge by it. Without causing the printed book, it may add your knowledge and make a person happier to read. It is most critical that, you must aware about reserve. It can bring you from one location to other place.
