## **New Perspectives of Central Nervous System Injury and Neuroprotection, Volume 102 (International Review of Neurobiology)**

Central nervous system (CNS) diseases such as Alzheimer's disease, Parkinson's disease, and amyotrophic lateral sclerosis affect a large number of populations worldwide for which no suitable cure is currently available. In addition, stroke, nanoparticle intoxication, diabetes, hypertension, and psychostimulant abuse either alone or in combination are capable of inducing potential brain damage. Thus, there is an urgent need to expand our knowledge to find suitable therapeutic strategies to enhance neurorepair processes in such diseases.

This volume presents neuroprotection and novel therapeutic strategies developed in the last 5 years by 12 world leaders in the field. The term neuroprotection means rescuing neuronal and non-neuronal cells together. The cerebral endothelium that constitutes the anatomical and physiological site of the blood-brain barrier (BBB) is one of the most important non-neuronal cells in the CNS. Any distortion of the BBB leads to brain diseases and restoration of the barrier results in neuroprotection. Thus, the BBB appears to be the "gateway" for neurological diseases and neurorepair. However, to treat brain tumors or infarcts, new therapeutic strategies are needed to enhance brain drug delivery using nanotechnology. In addition, apart from conventional drugs, restoration of BBB function could also be achieved by means of antibodies directed against specific proteins, neurotransmitters or exogenous supplement of neurotrophic factors. Since co-morbidity factors e.g., hypertension, diabetes, and exposure of nanoparticles could complicate the pathogenesis of neurological disorders either an enhanced dose of the drug or nanodelivery of a combination of several drugs is needed to achieve neuroprotection.

This volume of *International Review of Neurobiology* is the first to discuss novel therapeutic strategies in situations of neurological disorders in combination with different co-morbidity factors.

Reviews written by experts in such a way that provides basic knowledge for beginners and advanced information for researchers and experts.

New aspects of Neurodegenerative diseases such as; Alzheimer's Disease, Parkinson's Disease, Amyotrophic Lateral Sclerosis are presented with the latest therapeutic measures.

Exacerbation of brain pathology in hypertension or diabetes is discussed for the first time.

### **From reader reviews:**

#### **Bessie Morris:**

Do you have favorite book? If you have, what is your favorite's book? Guide is very important thing for us to be aware of everything in the world. Each e-book has different aim or perhaps goal; it means that guide has different type. Some people truly feel enjoy to spend their time for you to read a book. They may be reading whatever they acquire because their hobby is definitely reading a book. Why not the person who don't like reading a book? Sometime, man or woman feel need book once they found difficult problem or even exercise. Well, probably you will want this New Perspectives of Central Nervous System Injury and Neuroprotection, Volume 102 (International Review of Neurobiology).

#### **Mark Copeland:**

Now a day folks who Living in the era where everything reachable by interact with the internet and the resources included can be true or not require people to be aware of each info they get. How individuals to be smart in having any information nowadays? Of course the correct answer is reading a book. Reading through a book can help folks out of this uncertainty Information particularly this New Perspectives of Central Nervous System Injury and Neuroprotection, Volume 102 (International Review of Neurobiology) book since this book offers you rich details and knowledge. Of course the details in this book hundred pct guarantees there is no doubt in it you know.

#### **Eric Bittinger:**

Your reading sixth sense will not betray an individual, why because this New Perspectives of Central Nervous System Injury and Neuroprotection, Volume 102 (International Review of Neurobiology) reserve written by well-known writer whose to say well how to make book which can be understand by anyone who also read the book. Written within good manner for you, still dripping wet every ideas and writing skill only for eliminate your personal hunger then you still uncertainty New Perspectives of Central Nervous System Injury and Neuroprotection, Volume 102 (International Review of Neurobiology) as good book not simply by the cover but also from the content. This is one e-book that can break don't assess book by its protect, so do you still needing one more sixth sense to pick this!? Oh come on your studying sixth sense already said so why you have to listening to yet another sixth sense.

#### **David Whetstone:**

Is it a person who having spare time after that spend it whole day by watching television programs or just lying on the bed? Do you need something totally new? This New Perspectives of Central Nervous System Injury and Neuroprotection, Volume 102 (International Review of Neurobiology) can be the response, oh how comes? The new book you know. You are consequently out of date, spending your time by reading in this new era is common not a nerd activity. So what these ebooks have than the others?
