Our Combined resource includes all the required fundamentals for teaching the Human Body. We take your students through a fascinating study of the human body with current information written for remedial students in grades 5 to 8. We start off with an in-depth study of both the muscular and skeletal systems. Then we investigate the organs of the five senses, along with the respiratory system! We also look inside the kidneys and intestines, and then how a tiny sperm and egg cell can grow into a baby. Using simplified language and vocabulary we then explore the major organs of four body systems and how they work to keep us alive and healthy. Reading passages, student activities, and color mini posters all included. All of our content meets the Common Core State Standards and are written to Bloom's Taxonomy and STEM initiatives.
