Cloud Computing: Concepts, Technology & Architecture (The Prentice Hall Service Technology Series from Thomas Erl) Thomas Erl, Ricardo Puttini, Zaigham Mahmood

Clouds are distributed technology platforms that leverage sophisticated technology innovations to provide highly scalable and resilient environments that can be remotely utilized by organizations in a multitude of powerful ways. To successfully build upon, integrate with, or even create a cloud environment requires an understanding of its common inner mechanics, architectural layers, and models, as well as an understanding of the business and economic factors that result from the adoption and real-world use of cloud-based services.

In *Cloud Computing: Concepts, Technology & Architecture*, Thomas Erl, one of the world's top-selling IT authors, teams up with cloud computing experts and researchers to break down proven and mature cloud computing technologies and practices into a series of well-defined concepts, models, technology mechanisms, and technology architectures, all from an industry-centric and vendor-neutral point of view. In doing so, the book establishes concrete, academic coverage with a focus on structure, clarity, and well-defined building blocks for mainstream cloud computing platforms and solutions.

Subsequent to technology-centric coverage, the book proceeds to establish business-centric models and metrics that allow for the financial assessment of cloud-based IT resources and their comparison to those hosted on traditional IT enterprise premises. Also provided are templates and formulas for calculating SLA-related quality-of-service values and numerous explorations of the SaaS, PaaS, and IaaS delivery models.

With more than 260 figures, 29 architectural models, and 20 mechanisms, this indispensable guide provides a comprehensive education of cloud computing essentials that will never leave your side.

From reader reviews:

David Lucero:

The book Cloud Computing: Concepts, Technology & Architecture (The Prentice Hall Service Technology Series from Thomas Erl) can give more knowledge and information about everything you want. Exactly why must we leave the good thing like a book Cloud Computing: Concepts, Technology & Architecture (The Prentice Hall Service Technology Series from Thomas Erl)? Several of you have a different opinion about book. But one aim that book can give many details for us. It is absolutely proper. Right now, try to closer with your book. Knowledge or info that you take for that, it is possible to give for each other; you are able to share all of these. Book Cloud Computing: Concepts, Technology & Architecture (The Prentice Hall Service Technology Series from Thomas Erl) has simple shape however you know: it has great and large function for you. You can appearance the enormous world by open up and read a reserve. So it is very wonderful.

Jared Smith:

You can spend your free time to study this book this book. This Cloud Computing: Concepts, Technology & Architecture (The Prentice Hall Service Technology Series from Thomas Erl) is simple bringing you can read it in the park your car, in the beach, train and also soon. If you did not include much space to bring typically the printed book, you can buy often the e-book. It is make you easier to read it. You can save the particular book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.

Patricia Northcutt:

That guide can make you to feel relax. This specific book Cloud Computing: Concepts, Technology & Architecture (The Prentice Hall Service Technology Series from Thomas Erl) was colorful and of course has pictures on the website. As we know that book Cloud Computing: Concepts, Technology & Architecture (The Prentice Hall Service Technology Series from Thomas Erl) has many kinds or category. Start from kids until adolescents. For example Naruto or Private investigator Conan you can read and believe you are the character on there. So , not at all of book are generally make you bored, any it makes you feel happy, fun and rest. Try to choose the best book for you and try to like reading that will.

Douglas Moskowitz:

As a student exactly feel bored for you to reading. If their teacher requested them to go to the library in order to make summary for some book, they are complained. Just very little students that has reading's spirit or real their hobby. They just do what the teacher want, like asked to go to the library. They go to right now there but nothing reading really. Any students feel that reading is not important, boring along with can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we want. Likewise word says, ways to reach Chinese's

country. So , this Cloud Computing: Concepts, Technology & Architecture (The Prentice Hall Service Technology Series from Thomas Erl) can make you sense more interested to read.
