T.S. Michael

How to Guard an Art Gallery and Other Discrete Mathematical Adventures T.S. Michael

What is the maximum number of pizza slices one can get by making four straight cuts through a circular pizza? How does a computer determine the best set of pixels to represent a straight line on a computer screen? How many people at a minimum does it take to guard an art gallery?

Discrete mathematics has the answer to these and many other questions of picking, choosing, and shuffling. T. S. Michael's gem of a book brings this vital but tough-to-teach subject to life using examples from real life and popular culture. Each chapter uses one problem such as slicing a pizza to detail key concepts about counting numbers and arranging finite sets. Michael takes a different perspective in tackling each of eight problems and explains them in differing degrees of generality, showing in the process how the same mathematical concepts appear in varied guises and contexts. In doing so, he imparts a broader understanding of the ideas underlying discrete mathematics and helps readers appreciate and understand mathematical thinking and discovery.

This book explains the basic concepts of discrete mathematics and demonstrates how to apply them in largely nontechnical language. The explanations and formulas can be grasped with a basic understanding of linear equations.

From reader reviews:

Ian Coghlan:

The book untitled How to Guard an Art Gallery and Other Discrete Mathematical Adventures is the publication that recommended to you to learn. You can see the quality of the publication content that will be shown to anyone. The language that writer use to explained their ideas are easily to understand. The article author was did a lot of investigation when write the book, therefore the information that they share for you is absolutely accurate. You also might get the e-book of How to Guard an Art Gallery and Other Discrete Mathematical Adventures from the publisher to make you considerably more enjoy free time.

John Morris:

Playing with family in a park, coming to see the ocean world or hanging out with buddies is thing that usually you will have done when you have spare time, then why you don't try issue that really opposite from that. One activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love How to Guard an Art Gallery and Other Discrete Mathematical Adventures, you could enjoy both. It is fine combination right, you still need to miss it? What kind of hang-out type is it? Oh come on its mind hangout folks. What? Still don't have it, oh come on its named reading friends.

Linda Griffin:

As we know that book is vital thing to add our know-how for everything. By a guide we can know everything we want. A book is a list of written, printed, illustrated or maybe blank sheet. Every year has been exactly added. This book How to Guard an Art Gallery and Other Discrete Mathematical Adventures was filled with regards to science. Spend your spare time to add your knowledge about your scientific research competence. Some people has several feel when they reading any book. If you know how big selling point of a book, you can sense enjoy to read a publication. In the modern era like today, many ways to get book which you wanted.

Frances Coffey:

Guide is one of source of knowledge. We can add our expertise from it. Not only for students and also native or citizen require book to know the revise information of year for you to year. As we know those guides have many advantages. Beside many of us add our knowledge, may also bring us to around the world. By book How to Guard an Art Gallery and Other Discrete Mathematical Adventures we can take more advantage. Don't you to be creative people? To get creative person must prefer to read a book. Simply choose the best book that acceptable with your aim. Don't always be doubt to change your life with that book How to Guard an Art Gallery and Other Discrete Mathematical Adventures. You can more attractive than now.
